LEADERSHIP SUMMARY

Strategic Engineering Leader with 16+ years designing and delivering large-scale distributed systems, integration platforms, and AI-enabled workflow products. Proven at building high-performance engineering organizations, defining product-technology roadmaps, and delivering measurable business outcomes (platform adoption, reduced time-to-market, operational reliability). Experienced across startups and enterprise at Amazon, Oracle, and Docusign. I combine hands-on architecture experience with people-first leadership to scale teams and systems for global impact.

CORE LEADERSHIP COMPETENCIES

- Platform & Systems Architecture | Distributed Systems | Microservices
- Integrations & API Platforms | Federated Data & RAG solutions
- AI/ML Productization (LLMs, RAG, NLP-driven UX)
- Cloud (AWS/GCP/Azure), Kubernetes, CI/CD, Observability
- Cross-functional Leadership | Roadmap & Stakeholder Management
- Talent Acquisition, Team Scaling & Mentorship

SELECTED ACHIEVEMENTS

- Scaled India Strategic Integration engineering team from 2 → 52 engineers while maintaining delivery velocity and onboarding throughput.
- Launched Workflow Chaining feature and Early Access Program at Docusign, enabling customers to extend agreement actions into business workflows.
- Architected and delivered a Federated RAG system to surface fresh, reconciled data across customer systems and CRMs.
- Built a natural-language-driven Dynamic Workflow Generator to reduce customer setup time for workflow templates.

EXPERINCE

Software Development Manager III — **Docusign** — Nov 2023 – Present (~3y)

- Integration Platform for Docusign: Spearheaded the development of a seamless integration platform for third-party developers, enabling smooth connectivity with Docusign services.
- Workflow Chaining for Agreements: Led the design and release of the workflow chaining feature, empowering customers to extend Docusign agreement actions into their existing business workflows. Successfully launched the Early Access Program (EAP) for customers.
- Federated RAG (Realtime Analytics Grid): Built and led a team to deliver federated RAG for Docusign customers, addressing stale data issues. Designed a dynamic system that detects systems of record in real-time, integrates Docusign with customers' CRM systems, and performs CRUD operations on third-party data sources.
- Dynamic Workflow Generator: Directed a team to create a natural language-driven dynamic workflow generator. Enabled customers to generate starter workflow templates from their requirements, reducing manual setup efforts.
- Grew the India integration engineering team from 2 to 52 members, optimizing recruitment and onboarding processes.
- Transitioned revenue-critical applications (MS Word/Outlook plugins, Chrome extensions) to the India development center.
- Improved engineering visibility by introducing product dashboards for key metrics and enhancing team efficiency.

Head Of Engineering / Director of Technology — **HomoRx** (Stealth Startup) — Apr 2022 – Nov 2023 (1y 10m)

- Medication Assistance (CDSS) & Home Care: Built a robust home care system that assisted patients in managing their medications effectively, improving overall treatment outcomes.
- System Architecture:
  - Architected a highly scalable, modular, and fault-tolerant platform capable of handling rapid growth.
  - Introduced microservices architecture to ensure efficient scaling and reduce time-to-market for new features.
  - Integrated third-party APIs for drug databases, enabling real-time access to critical medical information.
- Collaborated with cross-functional teams to define product roadmaps, align priorities, and deliver features on time.

- Set up CI/CD pipelines and cloud-based infrastructure for high availability and continuous deployment.
- Recruited, mentored, and managed a team of engineers, fostering an environment of innovation and technical excellence.
- Established software engineering best practices, including code reviews, testing frameworks, and performance benchmarks, to improve product quality and team productivity.

Software Development Engineer II **Amazon** Apr 2016 - Apr 2022 (6y 1m)

- Amazon AppStore: Designed scalable features for the AppStore platform, improving developer onboarding and customer satisfaction. Built a secure app ingestion system to streamline compliance checks and enhance automation.
- Amazon Academy:
  - Delivered a knowledge representation system to map and normalize content across education providers.
  - Designed personalized learning experiences by integrating cognitive ability mapping into the product.
  - Played a pivotal role in product evolution as an early member of the Amazon Academy team.
  - Developed a high-performance rendering engine for the mobile app, improving speed and reliability.
  - Contributed reusable libraries adopted across Amazon's internal applications.

Member Technical Staff **Oracle** May 2015 – Apr 2016 (1 y)

- Optimized middleware applications for high-performance message processing using multithreading.

Assistant System Engineer **Tata Consultancy Services** Jan 2014 – Apr 2015 (1y 4m)

- Integrated telecom CRM systems with backend services, ensuring seamless data flow across modules.

Founder, Software Engineer **Addin.in** Apr 2010 – Dec 2013 (3y 9m)

- Early-stage startup to digitize the presence of small-scale industries through web and mobile application development.
- Product Strategy & Delivery Guidance - Partner with startups to translate customer needs into actionable product roadmaps, set delivery priorities, and accelerate go-to-market timelines.
- Growth Enablement - Helped multiple startups secure seed funding and early customers by defining MVPs, optimizing user experience, and demonstrating measurable value to investors.
- Tech Motivational Speaker - Deliver keynote sessions, workshops, and mentoring talks at community events, inspiring young professionals and student innovators to pursue careers in technology and entrepreneurship.
- Community Leadership - Active contributor to the startup ecosystem through mentoring programs, accelerators, and hackathons, fostering innovation, leadership skills, and a culture of execution excellence.

EDUCATION

COURSE	UNIVERSITY / BOARD	INSTITUTION
CHIEF TECHNOLOGY OFFICER, (MANAGEMENT DEVELOPMENT PROGRAME)	Indian Institute of Management, Kozhikkode (IIMK)	Indian Institute of Management, Kozhikkode (IIMK)
MASTET OF BUSINESS ADMINISTRATION	Indian Institute of Management, Kozhikkode (IIMK)	Indian Institute of Management, Kozhikkode (IIMK)
BACHELOR TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING	Cochin University of Science and Technology (CUSAT)	College of Engineering, Chengannur
HIGHER SECONDARY (XII)	State higher secondary board	Technical higher secondary school, Vazhakkad, Kerala

MENTORSHIP

Mentor and community leader helping startups prioritize customer-driven features, shape product roadmaps, and deliver high-impact outcomes, while inspiring young minds as a tech motivational speaker and actively fostering innovation in the startup ecosystem.
